She has participated as a research fellow responsible for Italian activities in projects co-funded by the European Union, through which she has developed excellent abilities to work in diverse teams and strengthen organizational and work-planning skills based on short and medium-term objectives. Her involvement in national and international working groups and projects has allowed her to enhance communication skills, particularly in English, build a strong network within the international academic community, and demonstrate her interpersonal skills in various professional contexts. In this regard, she has also been involved in organizing high-profile scientific events, combining her research aptitude with other soft skills.

Even after passing the bar exam, Francesca has focused on her post-doctoral academic career. She has gained teaching experience in law degree courses and the professional legal specialization school in Brescia. She has been a speaker at numerous seminars and conferences in Italy and abroad, given lectures in doctoral programs at prestigious Italian universities, and delivered presentations on sustainability, greenwashing, and statutory clauses enabling the pre-regulation of a partner's death in partnerships.

Francesca is author of two monographs (Il caso 'dieselgate'. Questioni risolte e tensioni irrisolte tra mercato e sostenibilità, ESI, 2021; Le dichiarazioni di sostenibilità nella fornitura di beni di consumo, Giappichelli, 2022) and she has published many scientific articles in top-level journals.

Her main expertise lies in the field of private law, commercial law, and law & economics, consumer and antitrust law, with a focus on current issues in corporate governance, such as intergenerational wealth transfer, the legal relevance of CSR communication, and the impact of ESG factors and risks on business activities.

Since 2022, she has been providing consultancy services in corporate sustainability, leveraging her scientific and academic background. In particular, she has been involved in managing and monitoring CSR aspects that involve relationships between companies and stakeholders. Her work includes drafting and reviewing ethical and conduct codes, monitoring their implementation, mapping risks related to the use of uncertified sustainability statements, ensuring proper use of green claims, providing strategic advice for stakeholder engagement, and integrating ESG factors into business activities.
